

# Siddharth Shringi

Bangalore, India | +91 9468760456 | siddharthshringi@gmail.com | [LinkedIn](#) | [Github](#)

## SKILLS

---

- **Languages:** Ruby, JavaScript, TypeScript, SQL
- **Technologies & Tools:** Ruby on Rails, React, PostgreSQL, Tailwind, [Next.js](#), RSpec, MiniTest
- **Core Strengths:** API design & scaling, system performance optimization, test-driven development (TDD), cross-team collaboration

## EXPERIENCE

---

### Professional Sabbatical (Career Break)

Sep 2024 – Present

- Completed **CS50 (Harvard)** to strengthen algorithms, data structures, and systems programming.
- Built **Whisptext (Rails API + React app)** and a **Next.js portfolio site**, demonstrating end-to-end product development.
- Focused on **leadership, communication, and resilience**, returning stronger as a senior engineer.

### Saeloun

Remote, US

Software Engineer

Feb 2022 - Sep 2024

#### Foundation (E-commerce SaaS) via Saeloun

- Integrated *ShipStation* into the Foundation e-commerce application, streamlining order processing and fulfillment workflows.
- Implemented *ShipStation* webhooks to automate events such as order notifications, fulfillment shipping, and rejection processes, resulting in improved efficiency and real-time updates.
- **Stack:** Ruby on Rails, React

#### Haulhub (Construction Logistics SaaS) via Saeloun

- Developed key features for Haulhub's primary applications, DOTSlip and JobSlip.
- Worked on revamping the DOTSlip application and improved its design and functionality.
- Resolved critical bugs, improving application performance and user experience.
- **Stack:** Ruby on Rails, React, SQL, PostgreSQL, Redis

#### Internal Projects

- Improved the *Miru application*, an internal time tracking and employee management platform, by optimizing performance and fixing bugs.
- Developed and implemented a comprehensive leave management module, handling complex logic for various leave scenarios, such as days per month or days per week for *Miru*.
- Built a company website using Next.js and React, addressing functionality issues to ensure smooth operation.
- **Stack:** Ruby on Rails, React, [Next.js](#)

### BigBinary

Remote, US

Software Engineer

Jan 2020 - Nov 2021

### Intern

- Developed expertise in Ruby on Rails through hands-on projects.

- Built NeetoForm from scratch, eliminating the company's reliance on third-party form builders.

## E2Open via BigBinary

- Contributed to ongoing software maintenance and optimized the Ruby on Rails codebase, resulting in improved code quality.
- Implemented caching functionality using Redis, improving data retrieval times.
- Added new features to enhance application performance, leading to a better user experience.
- **Stack:** Ruby on Rails, React, Redis

## BLOGS

---
